Expertise in Bespoke Design

We work with leading party planners, agencies, corporates and end users to help them design bespoke themed events within our marquees.

We approach marquee interior design with a focus on space utilisation and people flow, whilst also keeping a firm eye on the aesthetic look and feel of our client's event to ensure we deliver against every expectation.

We worked with a leading private event planner to help them create a modern reception for a New Year's Eve wedding. The theme was to be minimalist and have a modern party vibe. We specified a 15m x 30m Premium curved roof marquee for the main party area fitted with flat white linings and clear roofs and gable. This allowed guests to enjoy the midnight fireworks in the warmth of a contemporary marquee on one of the biggest party nights of the year.

Trusted Partner at Large Scale Events

We are proud to work with some big brand names, helping them to stage large events whether that be multi participant sporting events, corporate occasions such as conferences, award / gala dinners, hospitality and experiential marketing events.

For the last three years we have designed and delivered a bespoke solution for Sahara Force India Formula 1 Team's hospitality facilities for the British Grand Prix.

In 2017 we created a chic corporate entertainment space utilising a 25m x 25m Premium curved roof structure for the main hospitality area. Designated zones were created utilising a mixture of high and low furniture, planting and wall panels, accented with shades of the client's corporate colours.

Bespoke decking steps were installed at the front of the open canopy, leading guests to the factory lawns, where an exhibition of current and past F1 cars were on display housed in a series of pagoda marquees.

Both the indoor and outdoor space was given a "paddock club" feel with white leather sofas, chrome trimmed tables and stools, tropical plants and anthracite grey carpet all of which were designed by our in-house décor team.

Premium Structures for Prestigious Venues and Clients

We were thrilled to work with a private corporate client at Blenheim Palace to install a 25m x 95m Premium curved roof structure to be used for a Gala Dinner celebration for 1250 guests.

The juxtaposition of a modern structure against the backdrop of Blenheim was a sight to behold.

Cutting Edge Design: Igloo

Our awesome Igloo structures have received anything but a frosty reception! The unique structure is second to none, with internal heights of up to 16m, this structure can span from 7.5m wide all the way up to 40m. It is the perfect party tent, temporary conference venue or can even be utilised as a destination in its own right, housing ice rinks, concerts and nightclubs.

Creating Standout Branded Environments

Last summer saw us back in the grounds of Blenheim Palace, this time to assist outdoor clothing brand Rohan with a pop up retail outlet for BBC Countryfile Live.

The marquee structure had to convey the same quality appearance of a permanent retail shop and deliver on some strict security measures.

We designed a structure fitted with hard wall panels, a retail style entry and exit point as well as ramps to ensure access was easy for all visitors.

Internally the structure was fitted with white timber walling to partition off the changing rooms, storage and office space. The exterior hard wall panels offered better security than a soft sided marquee, allowing stock to be secured safely.

In addition, we worked with Rohan to design a bespoke branded gable as well as internal branding for changing rooms, storage and office space.
