Our Contribution to Protecting the Environment (Offices and Warehouse)

- 1 50% Electricity consumed provided by solar power
- 2 100% Heating provided by renewable source (Biomass)
- 3 100% Cleaning and drying of PVC and lining materials by renewable source (Biomass)

Introducing Barnaby Jones

Barnaby Jones is one of our expert project managers. Starting at Fews Marquees as a rigger, Barnaby quickly progressed to sales in the wedding division and then on to project management in our corporate team.

Being qualified in PRINCE2 and SMSTS, Barnaby has also benefited from investment in CAD software to become proficient in producing 3D visuals and renders.

“It’s important that clients understand what we have agreed to build, so the production of visuals and detailed in-situ 3D renders ensures that there is clarity in communication and no surprises.”

As an experienced project manager, Barnaby guides each of his clients through every stage of the process, understanding the requirement and translating that into a proposal and quotation, then onto the delivery phase through to conclusion.

“This is a very satisfying role. I handle each project from initial enquiry right through product selection, build and de-rig, and the fact that clients soon rebook is a testament to the whole team’s commitment. At the successful conclusion of a project there is a real sense of achievement.”

FEWS NEWS

Welcome to the latest edition of Fews News

2018 proved to be a very exciting and productive year for Fews Marquees. We’ve invested heavily in our offer as well as our people, so I hope you enjoy an insight into the dynamic and fast moving world of major events.

fewsmarquees.co.uk

Exclusive to Few's Marquees

Featuring cutting edge structural technology and excellent acoustics, the Igloo allows event designers to create amazing spaces with unparalleled levels of height and light at their disposal. Suitable for large productions, the aluminium structure can be designed in modular lengths and widths with PVC coverings available in crystal clear, white opaque and black out finishes.

Technical Excellence

The Igloo is a unique structure with internal heights of up to 14 metres and almost unlimited length, it is available as standard in 30m width, but also 10m, 15m, 20m, 25m and 40m widths are available.

With a load bearing capacity of up to 3000kg per arch, the Igloo can comfortably support sound and lighting rigs for some of the biggest productions.

For events that require giant/super-structures, we can also offer spans of 50m, 70m and 90m.

Royal International Air Tattoo

Few events can rival the intensity, drama and spectacle on offer at the world's greatest airshow. The Royal International Air Tattoo, one of the UK's largest outdoor events, returned for 2018 on 13-15 July to mark a very special anniversary, the centenary of the Royal Air Force.

After careful selection, we were instructed to build not one, but six of our premium event structures including the Show Ground Reception, a Media Centre, a Techno Zone and a large Social Area for staff and volunteers. The weekend was full of sunshine being some of the UK's hottest days of the year. We hope to experience the same when we return in 2019!

Specification

- 'Techno Zone' - Two 25m x 40m curved roof premium structures with white flat keder fed linings
- 'Show ground reception' - A series of 5m x 5m Pagodas
- 'Media Centre' - A 15m x 25m structure, fitted with cassette floor and hard sides
- 'Social Area' - Two 15m x 24m structures with split levels connected with a walk way

A Party to Remember

A 21st birthday is always a very special occasion. This one was very special indeed. Over 350 guests were treated to a wonderland of bespoke design. From hand crafted Parisian shop frontages, a personalised dance floor, and even a living chandelier serving champagne. Our task was to build a solution on undulating ground suitable to contain some spectacular design features.

Using a range of premium structures (in the wake of the Beast from the East) with clear roofs, printed cobbled carpet and a flat white lining. We even added a clear roof viewing area structure for the breath-taking firework display which capped the evening.

This was a project which required working with several event specialists to produce a birthday party that was second to none, and the final result was one for which we are all very proud.

Specification

- 20m x 37.5m - Main Reception, Dining and Party Dance Floor
- 15m x 20m - Parisian High Street and Viewing Platform
- 10m x 30m - Kitchen, Toilets and Bar Storage
